54292 Trier

Dear Mr. Christ Chutanan,

After studying engineering at the University of Applied Sciences (Fachhochschule-Trier) for two years, I am planning to supplement my studies and get hands-on experience in a global work setting. While I was searching for a fitting company, I found yours.

I am particularly interested to become involved in one of your solar energy projects, but I am also open for other possibilities. The internship should start around September 2008, and last for five months.

As my resume indicates, I completed an education in the heating industry. This experience has been helpful to understand the impact of engineering concepts with regard to their practical application. I am hard-working, organized, and always willing to take on challenging tasks. I like team work and I am curious to see how people live and work in other countries and cultures. So I believe that I would make a useful contribution to your company, both in terms of my personal as well as technical skills.

As a native German speaker I am actively trying to improve my English even more. I already completed a course in Technical English and learned English in school for eight years. I am confident that my language and communication skills will be adequate for working at your company.

I look forward to hearing from you soon. If you need any additional information, I will be glad to supply it. Thank you in advance for considering me.

Sincerely,

Thomas Dreisbach

Curriculum Vitae

Personal details

Residential adress: Thomas Dreisbach
Paulinstraße 47
54292 Trier
Mobile: +49175/1681568
Date of birth: 01. Juni 1985
Nationality: German

Career objective

To expand my skills and my experience with an internship in renewable energy technologies in a leading company.

Education history and work experience:

October 2006-current: Fachhochschule Trier, University of Applied Sciences
Study of engineering, graduation (“Bachelor”) expected in
01/ 2010.
October 2005-June 2006 Technical diploma 2005/2006
January 2005-October 2005 I worked as a heating installer in a heating company.
October 2001-January 2005 Education as a heating installer
